Dolby Vision

Dolby Atmos

T R U
RESOLUTION

A TV with down firing stereo speakers using Dolby Atmos audio processing will provide breathtaking sound that has impressive clarity, richness, detail, and depth. A consumer can experience Dolby Atmos in the cinema and get that same Dolby Atmos experience in the home like no other sound solution.

Simplifies the expansion of the surround sound listening by providing primarily the perception of height channels, without requiring additional speakers. DTS achieve 3D surrounding sounds natively without sound conversion process from 2D to 3D.

QLED

androidtv

Use your voice to search for shows, control your TV, plan your day, and more. Just ask Google.

A TV QLED cria cores mais brilhantes, mais saturadas e mais precisas. O LED na maioria das TVs LCD emite luz branca, mas as TVs de pontos quânticos emitem luz azul.

Android TV gives you a smarter, easier way to get more from your TV.
