

O televisor QLED cria cores mais brilhantes, mais saturadas e mais precisas. O LED da maioria dos televisores LCD emite luz branca, pero os dos televisores de ponto cuántico emite luz azul.

A TV with down firing stereo speakers using Dolby Atmos audio processing will provide breathtaking sound that has impressive clarity, richness, detail, and depth. A consumer can experience Dolby Atmos in the cinema and get that same Dolby Atmos experience in the home like no other sound solution.

Simplifies the expansion of the surround sound listening by providing primarily the perception of height channels, without requiring additional speakers. DTS achieve 3D surrounding sounds natively without sound conversion process from 2D to 3D.
